

# Suraj MS

Bengaluru, Karnataka, India

 [surajmshivakumar@gmail.com](mailto:surajmshivakumar@gmail.com) |  [+91 7259116344](tel:+917259116344) |  <https://my-portfolio-8vjp.onrender.com/>  
 <https://www.linkedin.com/in/suraj-m-s-757540151/>

## Skills:

**Languages & Frameworks:** JavaScript (ES6+), Node.js, Express.js, React, Python

**Architecture:** Microservices, Event-Driven Systems, REST APIs, Monolithic

**Databases:** MySQL, Redis, MongoDB

**Cloud & DevOps:** AWS, Docker, Kubernetes, GitLab CI/CD, PM2

**Monitoring & Quality:** Grafana, SonarQube, Unit Testing (Jest)

**Tools:** Git, Linux, Firebase, Apache Kafka

## Experience

### Senior Software Engineer

**6D Technologies Pvt Ltd | June 2026 – Present**

- Designed, and developed LLD for 6+ microservices (including Outbound and Policy Engine), delivering scalable, high-performance service architectures.
- Contributed to architecture planning for a Full Entitlement Server, defining 8+ scalable service boundaries and end-to-end authorization flows.
- Implemented event-driven architecture using Kafka, enabling asynchronous processing and improving system decoupling, reducing request latency by 40%.
- Built 15+ Grafana dashboards for service health, Kafka metrics, latency, and error monitoring
- Mentored 5 engineers through code reviews, design discussions, and best-practice sessions.
- Wrote unit tests achieving 85%+ code coverage to improve reliability and production stability.
- Engineered and maintained production-grade CI/CD pipelines using GitLab CI/CD, Docker, Kubernetes, SonarQube, and Redis, reducing deployment time by 60% and improving release reliability.

### System Engineer

**Tata Consultancy Services | Aug 2021 - Dec 2024**

- Engineered full-stack MERN applications for enterprise clients.
- Built scalable **REST APIs** using Node.js and Express supporting 3+ microservices.
- Architected and optimized MySQL schemas and queries.
- Improved code quality by **resolving SonarQube issues** by 0% related to security and maintainability.
- Containerized services using **Docker** and supported **Kubernetes deployments**.
- Collaborated in Agile teams, delivering features with high quality and reliability.

### FREELANCE - Founder, Product Designer & Developer

Dec 2024 - April - 2025

- Designed, developed and deployed a client and employee management platform, achieving 100% automation of onboarding, tracking, and workflows.
- Led the full-cycle architectural strategy, leveraging the MERN stack for scalability, performance, and seamless multi-platform user experiences, supporting 1000+ customers.

## EDUCATION

### Vidya Vardhaka College of Engineering

Bachelor of Engineering - Information Science and Engineering

2017 - 2021
